

Built to fit any application • Stop costly idler replacements
• **Extend conveyor frame life** • **Reduce belt damage**
• **Eliminate load point spillage**

Strongco Engineered Systems' Impact Beds consist of a series of parallel shock absorbing rubber bars with low friction polyethylene top. They can be manufactured for any profile conveyor and for widths 24" to 96".

Flat surface counters beltsag and buckling. Reduces jamming and downtime.

Reduce conveyor operating costs by replacing costly impact idlers extending belt frame life and eliminating load-point spillage.

A simple maintenance-free system. Rugged construction. No moving parts. No lubrication. Easy to install, service and remove.

Impact bars and T-bolts available from stock. Side (troughing) sections can be removed separately for quick replacement of impact bars.

Standard length 4 feet. Other lengths on request.
